12Volt – 80Amp DC - HIGH POWER REMOTE AREA – VEHICLE / PLANT BATTERY CHARGER

ORIGINALLY AN AUSTRALIAN IDEA, THIS REMOTE AREA BATTERY CHARGER WAS DESIGNED TO MEET THE NEEDS OF NOT JUST OUTBACK TRAVELLERS, BUT ALSO FARMING, MINING, QUARRYING, PLANT AND CONSTRUCTION COMPANIES. PROVIDING REMOTE AREA USERS WITH A QUICK AND RELIABLE REMEDY TO FLAT BATTERIES.

AUSTRALIAN COMPONENTS, ASSEMBLED IN ENGLAND, USING HONDA POWER

SPECIFICATIONS:

Weight:	22kg
Dimensions (mm)	465 x 330 x 450 (L x W x H)
Alternator:	Australian Bosch 80 amp
Electrical output:	12 volts DC.
Max voltage (low):	14.0 volts regulated
Max voltage (high):	14.8 volts regulated
Max amp output:	80 amps
Voltage cut out:	18 volts
Charge Display:	Super Bright Red LED
Honda Engine:	98cc air-cooled 4stroke OHC
Max eng. power:	3.0hp (2.2kw) @ 3600rpm
Fuel capacity:	1.2 litres (unleaded)
Fuel consumption:	Approx. ¾ litre/hour
Oil capacity:	0.40 litres
Starting system:	Recoil

FEATURES INCLUDE:

- Environmentally friendly UK/EU compliant Honda engine, with worldwide guarantee.
- Australian made electrics & Bosch alternator with worldwide guarantee.
- Low oil level warning
- Low or high charge rate, at the flick of a switch.
- Short circuit and over voltage protection.
- DC power immediately when required
- Super bright LED charging indication.
- Lightweight, weighing only 48.5lbs.
- High current Leads, 3m long with insulated alligator clamps.
- Over 90mins charging per fuel tank filling
- Will charge up to 2 – N70 type cranking batteries simultaneously.
- Assembled in England by **BOAB**

USES:

- Emergency services or search & rescue organisations - backup for solar powered sites – heavy plant & machinery, construction & earthmoving contractors - caravans & mobile homes - mobile mechanics, trucking companies, recovery & breakdown services – machinery auctions or anyone working or travelling in outback or remote areas, where flat batteries could be life threatening.
- Especially useful in the marine & boating industry, particularly boatyards – recharge banks of on board batteries without the need to remove and transport.
- Users can supply enough charge in as little as a few minutes to start heavy plant, trucks & machinery.
- Campers can run fridges for 24 hours then re-charge their batteries in under 1 hour.
- 12 Volt lighting or other appliances can be powered in emergency situations.

PRICE:

12 Volt – 80 amp, 3.0hp Battery Charger with super bright red LED charging light:

£835.00 (inc 20% VAT)
